7. Recommendations

1. **Deploy a CMP solution** (e.g. Axeptio, Didomi, OneTrust, Cookiebot) that displays a consent modal before any non-essential cookie.
2. **Add a "Reject all" button** at the first layer of the modal, requiring no more clicks than "Accept all" (CNIL 2022).
3. **Do not set any non-essential cookie before consent.** Gate the initialisation of third-party scripts on acceptance.
4. **Remove or block non-essential cookies** after rejection, and verify consent handling server-side.

Scan Errors and Warnings

- ⚠️ No reject button found — could not test rejection flow
- ⚠️ No accept button found — could not test acceptance flow
